Beth Science, International

Litig

Robert

and Susan ~~and~~ Sean

Sean-RSA

Herb Yeaman - De Groot

Tom O'Leary - NBSA

RSK -

- can't live with 0.03 ppm -

Jess explained reasons for the  $10^{-6}$ .

3 ppm based on <sup>20.9</sup> neurotoxic study  
5 ppm and based on ~~not~~ satellite study

RSK - asked whether the Agency's 0.03 level would be a  $10^{-6}$  or even a ceiling -

- argue that ~~out~~  $10^{-6}$  level

Beth - cited 1994 -  $10^{-6}$  methodology -

Anders - "type 2 chemical" (potentially toxic to lung).

Jess proposed submitting a package to HPA on redacting the inter species scaling factor.

- next revision in early August -

- Stake holders meeting after next revision

Tim - raised next exposure studies.
